

NATIONAL VARDA DATA WAREHOUSE FOR EARLY CHILDHOOD EDUCATION AND CARE WILL BE USED TO SAVE DATA ON ATTENDING CHILDREN

The data warehouse for early childhood education and care (Varda) is a new national data warehouse to be launched on January 1, 2019. It will contain information on early childhood education and care actors and units, children attending early childhood education and care, the children's guardians, and ECEC personnel. Provisions on the data warehouse are contained in the Act on Early Childhood Education and Care. The data warehouse will be used to promote the development of early childhood education and care, and to facilitate decision-making, to compile statistics and to carry out research on this field, and to perform official duties. The data warehouse will be maintained by the Finnish National Agency for Education.

Under Act on Early Childhood Education and Care, municipalities and joint municipal authorities will have an obligation to upload data on ECEC organizers and units as well as children's data in Varda as of January 1, 2019. The data to be uploaded contain personal data on children attending early childhood education and care. This personal data on children comprise:

- name, identity number, mother tongue, municipality of residence, and contact details
- the ECEC unit the child attends
- submission date of the application
- start and expiry dates of a decision or a contract
- scope of the right to early childhood education and care in hours and information on the use of this right
- indication that early childhood education and care is organized as non-standard-hour child care
- the form in which early childhood education and care is organized

Through the learner ID register maintained by the Finnish National Agency for Education, the following personal data of the data subject will also be linked to Varda:

- name, learner ID and identity number or other similar identifying data, nationality, gender, mother tongue, and the required contact details.

Our municipality/joint municipal authority will upload data from our operative ECEC information system to Varda through system integration/save the data in Varda through a user interface as of x x 2019.

Data on personnel and custodians will be saved in Varda as of September 1, 2019. The Finnish National Agency for Education and the municipality/joint municipal authority will inform the data subjects about the saving of personnel and custodian data at the latest in summer 2019.
