

# This is how you log into DigiOne for the first time, when using Suomi.fi authentication

## Step 1: Verify your identity

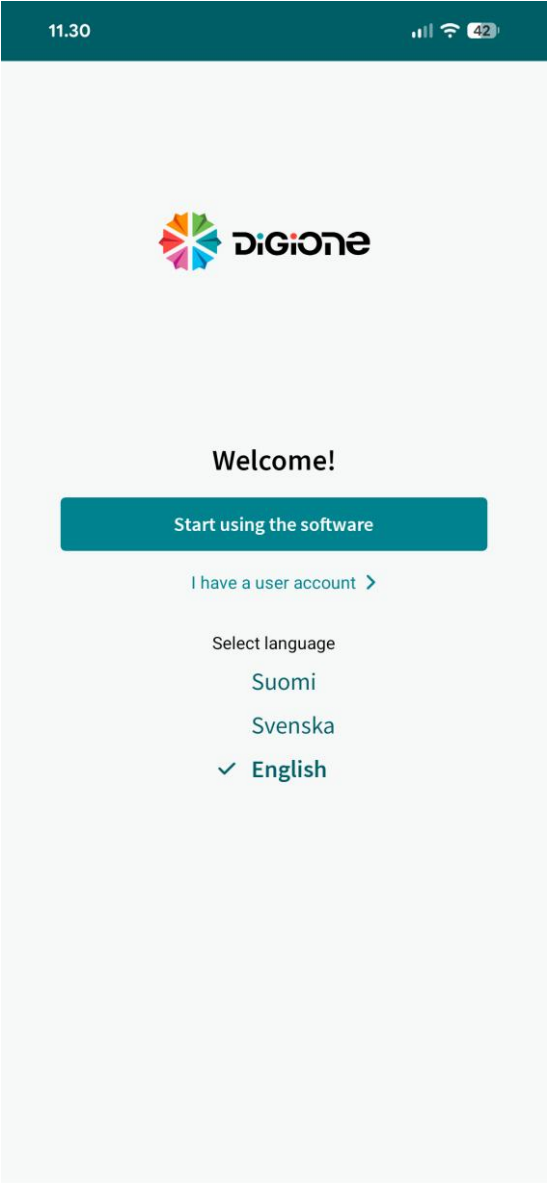

Enter the login page address in your browser's address bar: <http://app.digione.fi/>

Open the page and choose the language you want to use.

Click the Sign in button.

Click Start using the software.

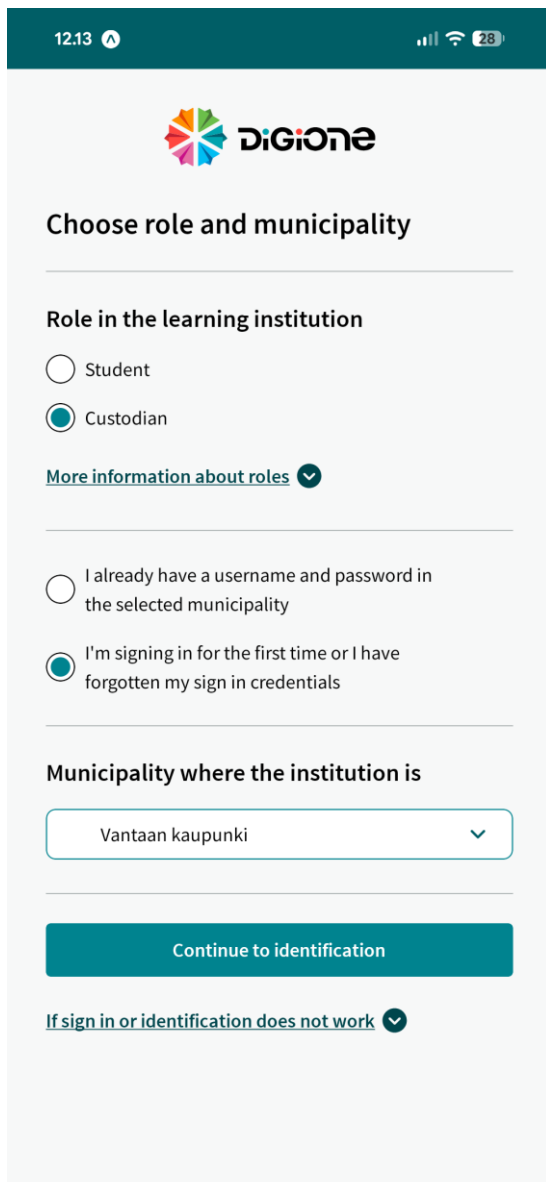

Select guardian as the user role.

From the drop-down menu, select the municipality where the student's school is located (Vantaa).

Choose I'm signing in for the first time or I have forgotten my sign in credentials.

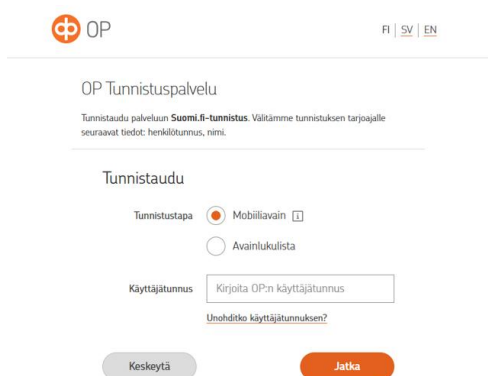

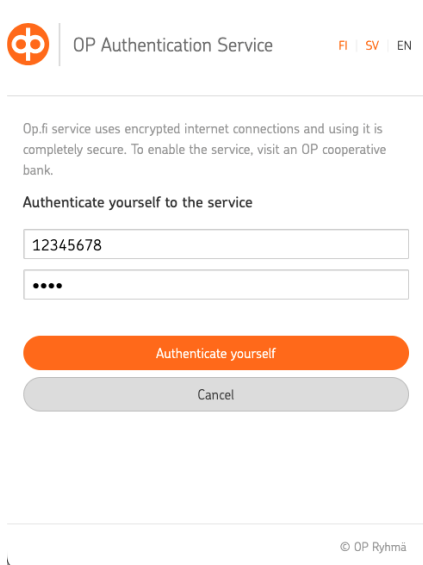

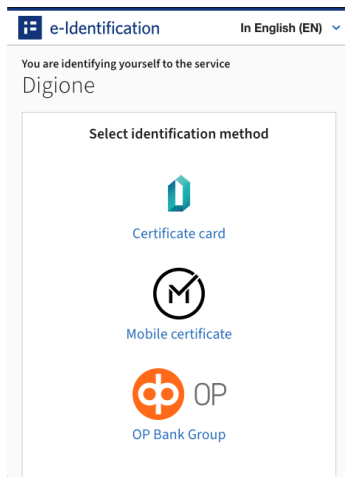

Click Continue to identification.

The screenshot shows a mobile application interface for DiGiOne. At the top, there is a status bar with the time 12:13, signal strength, Wi-Fi, and battery level at 28%. Below the status bar is the DiGiOne logo, which consists of a colorful starburst icon followed by the text "DiGiOne". The main heading is "Choose role and municipality". Underneath, there is a section titled "Role in the learning institution" with two radio button options: "Student" (unselected) and "Custodian" (selected). Below this is a link "More information about roles" with a downward arrow. The next section has two radio button options: "I already have a username and password in the selected municipality" (unselected) and "I'm signing in for the first time or I have forgotten my sign in credentials" (selected). Below this is a section titled "Municipality where the institution is" with a dropdown menu currently showing "Vantaan kaupunki". At the bottom of the form is a large teal button labeled "Continue to identification". Below the button is a link "If sign in or identification does not work" with a downward arrow.

Suomi.fi authentication will open options for verifying your identity. You can log in using, for example, your online banking credentials or a mobile certificate.

In the example below, the user verifies their identity by using their online banking credentials.

Click the Continue to service button.

You are identifying yourself to the service

DigiOne

The following details are transmitted when you submit your identification:

**Personal identity code:**

070770-905D

**Last name:**

Asiakas

**First names:**

Antero OP

**Municipality of residence:**

Kuopio

**Postal address:**

Sepänkatu 11 A 5 , 70100 KUOPIO

**e-mail address**

antero.asiakas@testidvv.fi

## Step 2: When you have verified your identity, create a user ID and password

Create a user identifier and password for yourself. You will use them in the future, whenever logging into DigiOne.

If the username is already in use, you will receive an error message. Please select a new username.

The password must contain at least 16 characters.

Make sure to store your username and password safely.

### Antero Asiakas

---

#### Create a username and password

Create a username for the chosen municipality. Choose a username that is easy to remember, such as an email address or any other string. Please note that the same username cannot be used in multiple municipalities.

**Username \***

Choose a password that is easy to remember but hard for others to guess.  
The password:

- Must contain at least 14 characters
- Can not be longer than 360 characters
- Must contain more than 1 different characters

**Password \***

**Password again \***

Please check that your contact information is correct.

---

### Contact information

The provided contact information will be used to complete the registration. Ensure that the contact information is correct and that you can receive a confirmation message in the next step when you sign in.

**Phone number \***

**Phone number again \***

**Email \***

**Email Again \***
