

VOCATIONAL TRAINING CENTRES IN GALICIA

SENDING PARTNERS

Vocational Training Schools of Galicia. This project is “Next Station: Improving Professional Skills in Galicia III” in Call 2019.

There are forty-nine (45) Vocational Training Centres with 24 different vocational families, among them:

- Twenty-five (25) centres have Secondary Education and Vocational Training programmes and
- Nineteen (19) centres are Integrated Vocational Training Centres and count with an international programme coordinator and an entrepreneur activities coordinator. They offer an interesting modality called Dual Vocational Training System (FP Dual) that combines the technical training at the educational centre and the internship educational in different companies.

These are the different qualifications in vocational training that our centers offer in Galicia:

- Technician in Gardening and Florist
- Technician in Olive Oils and Wines
- Technician in Agro-ecological Production
- Technician in Cookery and Gastronomy
- Technician in Bakery, Patisserie and Confectionery
- Technician in Dressmaking and Fashion
- Technician in Catering Services
- Technician in the Preparation of Foodstuffs
- Technician in Sales
- Technician in Administrative Management
- Technician in Microcomputer Systems and Networks
- Technician in Construction or Building
- Technician in Construction finishing expert and Restoration
- Technician in Hairstyling
- Technician in Carpentry and Furniture
- Technician in Installation and Furnishing
- Technician in Welding and Boilermaking
- Technician in Personal Aesthetics
- Technician in Bodywork

- Technician in Motor Vehicles Electro mechanics
- Technician in Mechanical
- Health Care Assistant
- Technician in Telecommunication Installations
- Technician in Graphic Arts Digital Pre-printing
- Technician in Graphic Arts Printing
- Technician in Laboratory
- Technician in Refrigeration Installations
- Technician in Fitting and Maintenance of cooling, air-conditioning and heating facilities
- Technician in Electrical and Automatic Installations
- Technician in Pharmacy and Parapharmacy
- Technician in Machining
- Technician in Emergency Health Care
- Heat System Installations
- Technician in Nursery Assistant

CIFP Politécnico Lugo

LOCATION: LUGO

Located on a hill on the banks of the river Miño, the city of Lugo preserves major remains of its Roman past, among them its ancient wall, declared a World Heritage Site by UNESCO. Inside the walls, the city conserves quiet pedestrian streets, wide squares and spacious gardens, where buildings such as the Cathedral, the Archiepiscopal Palace, and the City Hall stand out. But the historic quarter also houses some of the best restaurants in Galicia, where it is possible to sample the excellent fresh meats and fish which have earned that the gastronomy of Lugo is recognized acclaim.

CIFP Porta da Auga

LOCATION: RIBADEO

The Ribadeo estuary forms a natural link between Galician territory and the neighbouring lands of Asturias on the opposite bank. On this deep estuary, formed by the river Eo, the main town is Ribadeo.

The Marquis of Sargadelos was the modern promoter of this city whose most outstanding building is the modernist Galician country house of the Moreno brothers. From the port of Porcillán, which is Roman origin, it is a pleasant walk to the lighthouse of Pancha island, situated on the mouth of the estuary, passing the ruins of the castle of San Damián.

It is also a good idea to spare some time for As Catedrais, one of the most beautiful stretches of sand on the Galician coastline. Its rocks, which form natural arches resembling a cathedral, create a magical landscape which changes with the tides, the high point of a walk facing the open sea.

CIFP Portovello

LOCATION: OURENSE

The river Miño, which crosses the city halfway through its course, has determined the current appearance of the provincial capital. Almost two thousand years ago, the Romans settled in this land attracted, among other reasons, by its thermal springs. The best-preserved legacy of that age is “a ponte vella” (the old bridge), which connects the banks of the Miño and that has grown to be the symbol of the city. There are some ashlar stones preserved from the original Roman bridge at the base. This major piece of civil engineering was restored in the 13th and 17th centuries, giving it its current appearance, with a pointed arch and ramps. The rich heritage in the capital can be discovered all along the streets which make up the Old City

CIFP A Farixa

LOCATION: OURENSE

Ourense was well known for the presence of hot springs called the Burgas. These can still be seen today and they reach temperatures between 60 and 100° Celsius. Apart from these thermal water fountains, there are also other locations within the city that departs thermal water.

Imagine taking a dip in a large open-air thermal bath, by day or night, in any time of the year, in water with a temperature of over 40 degrees centigrade, and right beside the Miño river. All this can be experienced in Ourense, a city with a hidden underground ocean with five spa areas to enjoy for free, and where you can even see the mineral and medicinal waters bubbling out of the rock.

CIFP Carlos Oroza

LOCATION: PONTEVEDRA

Pontevedra is situated in the Rias Baixas (or lower bays) of Galicia and it is the most southern sea facing province. The name of Pontevedra refers to both the province and its self titled capital city. Interestingly, the port city of Vigo is in a lower bay in the south of Pontevedra city.

The city is historically famous, culturally rich and has a significant number of architectural attractions worth seeing. It has a very well preserved medieval town centre along with many small and popular squares, most of which have cafés and bars around them.

Pontevedra is extremely well catered for by "English" language guides and booklets. In fact we were able to get hold of no less than nine different English guide books (leaflets) about the [province](#) and its monuments from two of the city central tourist offices.

CIFP A Xunqueira

LOCATION: PONTEVEDRA

Pontevedra, a city with a long maritime and trading tradition, boasts one of the largest and most elegant historic quarters in Galicia. It is situated on the edge of the estuary of the same name and the old town extends in a network of streets and squares and contains major civic and religious buildings.

Called as Duos Pontes by the Romans, Pontevedra has adopted a character profoundly marked by the sea over the centuries, as it is demonstrated by the shipyards, fishing port and the intense commercial activity in the city.

The village of Combarro is located in the Rías Baixas estuaries, six kilometres from the city of Pontevedra. The old quarter in Combarro, which has been declared Property of Cultural Interest, is a representative example of three traditional architectural elements in Galicia: "hórreos" (raised granaries), "casas marineras" (sea houses) and crosses.

CIFP Manuel Antonio

LOCATION: VIGO

In the Galician province of Pontevedra, situated on the shores of the Atlantic Ocean, lies the city that lends its name to the southernmost estuary of the Rías Baixas: Vigo. Its fishing origin has left an historic quarter with a strong maritime flavour, which contrasts with the modern facilities of its marinas. This city is an excellent base from which to visit the towns and villages along the Vigo estuary and the Cíes Isles that form part of the National Park of the Atlantic Islands.

The port of Vigo, one of the finest natural ports in the world, was the origin of this city fringed by mountains. Its maritime qualities, already exploited in Roman times, have risen to the present-day marinas and the transatlantic port, as well as to the fishing and canning industries. All of this has contributed to the urban development of Vigo, which includes the traditional port area and boasts major historic buildings and wide tree-lined avenues.

CIFP Valentín Paz Andrade

LOCATION: VIGO

The city of Vigo is easily accessible thanks to the motorway, the train station and the airport, and there are also excellent nautical facilities. At its maritime station it is possible to purchase passages to the coastal towns of Cangas and Moaña on the other side of the estuary, and even to the Cíes Isles that are part of the **National Park of the Atlantic Islands**. The sheer cliffs and dunes of these isles are the home of thousands of migratory birds.

The park has four groups of islands that are distributed between the estuaries of Vigo, Pontevedra and Arousa. Once it was the haunt of pirates but now Cíes Isles are an uninhabited and pristine national park, open to the public only in summer.

Rodas Beach in Cies Isles was chosen by the UK newspaper “The Guardian” as the top one beach in the world.

CIFP A Granxa

LOCATION: PONTEAREAS (PONTEVEDRA)

It is located on the Vigo-Benavente highway and on the river Tea, a right-hand tributary of the Miño. It is the chief town of a fertile hilly region, which produces wine, grain and fruit, and contains many cattle farms. The main industries of the town are porcelain manufactures, tanning and distilling.

Close to the town there are the ruins of the Sobroso Castle, which played an important part in the medieval civil wars. In the council of Ponteareas we can find Mondariz, one of the main spa hotels in Galicia.

CIFP Paseo das Pontes

LOCATION: A CORUÑA

Situated beside the Atlantic Ocean, A Coruña is a historic city whose history has maintained close links with its old fishing and commercial port. We can visit the Tower of Hércules declared a World Heritage Site by UNESCO and one of the symbols of the city. There is an interesting Romanesque collection of streets, squares and medieval churches.

The Aquarium Finisterrae, the Domus and the Science Museum are some of the places that show the more modern, recreational side of the provincial capital, which offers one of its most beautiful facets in the wide beaches of Riazor and Orzán. All this is completed with a very good cuisine recognised throughout the country, marked by the excellence of its seafood and meats coming from the island parts of the province.

CIFP SOMESO

LOCATION: A CORUÑA

Costa da Morte (Coast of Death) is an area of important marine ecosystems, with steep cliffs, dunes and fishing villages with traditional lighthouses and beaches.

The characteristic landscape in the interior is formed by mountains and green valleys. Its natural resources include particularly the Fraguas de Eume Nature Reserve, the Corrubedo Dune Complex and the lakes of Carregal and Vixán.

The town of Fisterra was established on the site of an ancient fishing village, and still preserves its traditional layout. It is considered as the end of the Way of Santiago by many people. Towns like Muxía, with its famous chapel of Nosa Señora da Barca; Camariñas, where they still hand-make their wonderful bobbin laces; Laxe, with an important fishing port that takes up a wide inlet, and Malpica, located in the region of Bergantiños, mark the journey to Caión, the fishing village where our journey through Costa da Morte ends.

CIFP Ánxel Casal-Monte

Alto

LOCATION: A CORUÑA

It's always a pleasure to visit the Tower of Hércules, declared a World Heritage Site by UNESCO, and the beautiful bay in the city of A Coruña. But if you want to see it all from the heights, it sounds even better. There are two original ways to get a bird's-eye view of the city:

You can take a lift in the shape of a glassed-in sphere, which will carry you up to the Mount of San Pedro about a height of 100 m. Once you reach the top, you'll have a unique panoramic view from the interior all over the city.

Another option not to be missed is the experience of taking a half-hour sightseeing flight in a light aircraft from the A Coruña airport. For 30 minutes, you'll be treated to a highly original view of the Burgo estuary, Santa Cristina beach, Orzán beach, the city centre of A Coruña and San Pedro park. As well as offering the best views of the coastline and the green landscapes which are so typical in Galicia, you'll have the chance to take yourself the controls of the plane so you can say you've made your maiden flight.

CIFP Compostela

LOCATION: SANTIAGO DE COMPOSTELA

The Galician capital is synonymous with the Camino of Santiago, an ancient pilgrimage route, born in the 9th century, that has linked the city with the rest of Europe since then. Every year many thousands of pilgrims set out on foot, by bike, or even on horseback, to live this experience that combines adventure and spirituality. The final goal is the Cathedral of Santiago, one of the main sacred cities of Christendom.

Its historic centre has been designated a World Heritage Site by the UNESCO.

There are art and culture in its streets, but nature too because Santiago has many parks and gardens. An intense green pervades everything, not only within the city, but also in its surrounding area, where mountains and forests with luxuriant vegetation await.

CIFP Politécnico Santiago

LOCATION: SANTIAGO DE COMPOSTELA

The Cathedral of Santiago is the end of the pilgrim's journey and its monumentality is worthy of such a deed. It is a key Romanesque work in which numerous architectonic styles converge.

The construction of the cathedral began in the year 1075, during the reign of Alfonso VI and was promoted by Bishop Diego Peláez. The work was carried out under the orders of maestro Esteban on the remains of old temples raised in devotion to the saint. It was built with three naves and a Latin cross plan, on a surface area of around 8,300 squared metres. There are different architectonic styles in the building (Romanesque, Gothic, Baroque, Plateresque and Neoclassical). The Pórtico de la Gloria is the main entrance. It was constructed by Maestro Mateo in 1188 and houses hundreds of figures representing the Apocalypse. In it, the figure of the Apostle St. James appears to welcome the pilgrims from the Mullion, sustained on a column. The Obradoiro façade of the Cathedral was the work of Fernando de Casas y Novoa, and it is considered one of the greatest expressions of the Spanish Baroque period.

CIFP Coroso

LOCATION: SANTA UXIA DE RIBEIRA

Santa Uxía de Ribeira is the capital of the region of Barbanza (A Coruña). The port of Ribeira had a little importance in the region, partly due to several incursions of Vikings, Saracens and pirates from the 11th to 18th centuries. Nevertheless, it grew constantly to become one of the most important fishing ports in Galicia towards the late 18th century. At that time businessmen of Catalonia arrived in Ribeira and created a successful salting fish industry. King Alfonso XIII granted Ribeira the title of City in 1906.

Economically, Ribeira (or Riveira) is very dependent on the sea and it constitutes one of the most important shallow-water fishing ports in Spain. Cultivation of mussels and turbot represents an important source of income. The town also has splendid expectations facing the increase of tourism.

CIFP Rodolfo Ucha Piñeiro

LOCATION: FERROL

The sea has been a vital constant in the growth of this town, first as a fishing village and later as a military stronghold.

This town is 52 kilometres from A Coruña. It is full of contrasts, and the charm of its roots as a fishing village lives in its streets and traditions. The old town of Ferrol, the Modernist La Magdalena neighbourhood, the La Cortina defensive walls (18th century), and the castles of San Felipe and La Palma are just some of its attractions. The main event in the town, however, is the Easter week celebrations, which have the National Tourist Interest designation. They are usually held in March or April, depending on when Easter falls.

CIFP Ferrolterra

LOCATION: FERROL

The Port of Ferrol lies off the Atlantic Ocean on the shores of the Ferrol Inlet, just 19 kilometers northeast of the Port of A Coruña. It has long been an important ship-building center and port. It was the most important arsenal of Europe in the 17th Century. Today, it is the home of Navantia, the most important state-owned ship-building firm in Spain.

It was the base for the Maritime Exercise Loyal Marine of NATO in 2008. The most important industries of the city include horse breeding, fish farming and fishing, mining and quarries, and timber. Its ship-building industry is complemented by the manufacture of ship engines, electrical equipment, wind mill turbines and turbines for ships, textiles, canned fish, iron works, and wooden products.

CIFP As Mercedes

LOCATION: LUGO

The greatest example of the Roman legacy in the city of Lugo is its wall. It was built between the 3rd and 4th centuries AD that was known at the time as *Lucus Augusti*. This stone construction has managed to survive the passage of the centuries and continues being the most distinctive architectural feature in the city, marking the boundary between the historic quarter and the newer area of urban expansion.

CIFP A Carballeira – Marcos Valcárcel

LOCATION: OURENSE

Ourense, rumors have it, was called by the Romans “A cidade de ouro” (Auriense)(Gold City) because of the gold found in the river called “Rio Miño.”. The name of this city also has its Latin roots. For example aquae urente, (burning waters) or its Germanic translation: warm (hot Lake).

Industries include chemical manufacture, milk production, water bottling near Verín, and clothing manufacture near the capital city of Ourense. Although not a major tourist center, tourism contributes somewhat to the economy: the spectacular scenery of the river valleys attracts holidaymakers. There are several preserved medieval towns (Allariz and Ribadavia).
